

# More than 200 Mammoth Wind-Generators on Kythera?

Applications have been received proposing wind-parks on 10 sites on Kythera from 5 major corporations. Millions in long-term Greek government and EU subsidies are at stake. The island's pristine nature will be spoilt and more harm than good done to the environment!

**Green Energy?** The construction of a industrial wind-generator requires as much energy as the generator produces in 2 years. Add to that the enormous amounts of energy needed to build new ports and roads to enable the huge structures to be transported to and on the island, and thousands of tons of cement imported, trucked and poured for the foundation of each wind-generator. Hundreds of kilometres of new cable and major power-masts are needed to connect them to the closest relay station in the central Peloponnese. Will the proposed industrial wind-parks on Kythera ever produced enough energy to cover what they required to be set up? Is it worth the visual pollution of two-hundred towers to find out? And who will clear up the mess when most of them are useless wrecks in 15 or 20 years?

The following applications have been received by the Greek Regulatory Authority for Energy for the construction of industrial scale wind-farms on Kythera.

Application Number	Date	MW*	Location
Γ2909	10.10.07	30	Foinikies (4)
Γ2913	10.10.07	30	Merminagares (8)
Γ-3251	08.02.08	48	Krotiria (5), Kefalovouni (7), Pyrgos (6)
Γ-3250	08.02.08	42	Krotiri (10), Kefalokia (9)
Γ3808	10.02.09	48	Kserokampia (1)
Γ3809	10.02.09	52	Korthelithes (2)
Γ-3876	10.04.09	32	Karvounolakkos (3), Finikies (4)
Γ-3877	10.04.09	18	Mermingares (8)
Γ-3879	10.04.09	21	Krotiria (5), Kefalovouni (7)

**Total MW: 321\***

See the official Dept. of Energy Webpage listings yourself at [www.rae.gr/lic/lic\\_mainc.htm](http://www.rae.gr/lic/lic_mainc.htm)

\* MegaWatt. If 1.5MW Generators are used 321MW = 214 Wind-generators

**Your family village not on the list?**

Even the approval of one wind-park on Kythera will make it easier for the rest of Kythera to be re-zoned for industrial use. You might then see wind-towers and factories and dumps spoiling the view from your spitaki...
